

FUTURE PROSPECTS

Expanding the corpus:

About 600,000 additional data were digitalized from the *Biblia Patristica* archives, and the analysis of new corpora is ongoing. These data will progressively be put online.

The eventual goal is to cover the whole of Late Antiquity and the early Middle Ages.

Future functional improvements:

- development of a collaborative work site;
- automated retrieval of biblical intertextuality in texts;
- new ways of visualising the data;
- access to patristic texts from existing numerical references.

CAHIERS DE BIBLINDEX

BIBLINDEX is also a research seminar that leads to the publication of a series. Four volumes have already been published.

The BIBLINDEX project is led by the Sources Chrétiennes - HiSoMA team in Lyon. It is mainly funded by the French National Center for Scientific Research (CNRS). It has received additional funding from the Rhône-Alpes Region (2006), the National Research Agency (2011-2015), the Digital Scientific Library (2015-2016), the Association des Amis de Sources Chrétiennes and the de Montcheuil Foundation (2018-2022). It is currently part of the Equipex Biblissima+ (2022-2029).

To follow the project news, see its research blog,

with the one who reads them."

GREGORY THE GREAT, *Hom. in Ez.* VII, 8 (SC 327, p. 245)

FROM *BIBLIA PATRISTICA* ... TO BIBLINDEX

1965-2000 : *Biblia Patristica*

Between 1975 and 2000, the 8 volumes of *Biblia Patristica*, *Index of biblical quotations and allusions in patristic literature* (CNRS Editions), prepared by the Centre for Patristics Analysis and Documentation (CADP, Strasbourg), were published.

When the team ceased its activity in 2000, it entrusted Sources Chrétiennes with its database and further unpublished data, two CD-ROMs and lists of unverified and handwritten references (at least 500,000).

2006 - ... : BIBLINDEX

Since 2006, Sources Chrétiennes has progressively developed **BIBLINDEX**, a database which is the heir to *Biblia Patristica*, containing to date **400,000 biblical references**, namely:

- the 270,000 entries published in *Biblia Patristica*, which cover the first three centuries, along with part of the fourth, with updates:

1. Beginnings to Clement of Alexandria and Tertullian.
2. The third century (except Origen).
3. Origen.
4. Eusebius of Caesarea, Cyril of Jerusalem, Epiphanius of Salamis.
5. Basil of Caesarea, Gregory Nazianzen, Gregory of Nyssa, Amphilochus of Iconium.
6. Hilary of Poitiers, Ambrose of Milan, Ambrosiaster.
7. Didymus of Alexandria. Supplement, Philo of Alexandria.

- around 100,000 additional references coming from the CD-ROM:

Most of the following authors' works have been included:

- Athanasius of Alexandria
- John Chrysostom
- Theodoret of Cyrus
- Procopius of Gaza
- Jerome

The database includes 12 biblical texts written in different ancient (Hebrew, Greek, Latin, Syriac) and modern languages (French, English). A correspondence parser allows to visualise them in synoptic form and to identify discrepancies in their numbering.

Livre	Chapitre	Verset	Texte	Version	Langue	Notes
